MY BACKGROUND

I have a strong technical background in an environment where everyone is always hungry to learn and never afraid to ask questions. This has propelled me to be the team player I am today that is always ready to learn, be a mentor, and have great communication with my team to ensure everyone around me thrives. I am looking for an organization that never gets comfortable and is always looking to strive for greatness.

PROFESSIONAL SKILLS

HTML, CSS, JavaScript, Python,
Git, GitHub, Node.js, Express.js,
React.js, Django, MongoDB,
Mongoose, PostgreSQL

ALEXANDER HARRIS

FULL-STACK SOFTWARE ENGINEER

WORK EXPERIENCE

General Assembly

Software Engineering Fellow Sept 2021-Dec 2021

Worked closely with other software engineers to build applications, troubleshoot bugs, and learn new skills at an incredibly fast pace. We would maintain an average of 60 hours a week of coding/learning.

Project 1. [Giphy Portal](#) - An app that displays a random Gif based on a search query.

Technologies Used - [HTML](#), [CSS](#), [jQuery](#), [GIPHY API](#), [JavaScript](#), [Heroku](#)

Project 2. [ExoPlanet Logger](#) - Full-stack FULL-CRUD app that can create a new log for a newly discovered planet.

Technologies Used - [HTML](#), [CSS](#), [Node](#), [Express](#), [Mongoose](#), [MongoDB](#), [Heroku](#)

Project 3. [Rule of Thumb](#) - A Full-stack decoupled message-board app that's purpose is for people to share advice of different topics.

Technologies Used - [React](#), [HTML](#), [CSS](#), [JavaScript](#), [Node](#), [Express](#), [MongoDB](#), [Mongoose](#), [Heroku](#), [Netlify](#)

Project 4. [Chef for Hire](#) - A Full-stack Full-CRUD app designed to allow people to hire private chefs for various occasions! And vice-versa it allows a private chef to create a user friendly portfolio for clients to hire them.

Technologies Used - [Python](#), [HTML](#), [CSS](#), [Django](#), [PostgreSQL](#), [Heroku](#), [AWS S3](#)

Apple Inc.
